INTRODUCING

CELLULAR TAB MOUNT ANTENNAS

- **High efficiency and low profile**
- **Small ground plane requirement 91 or 100mm depending on antenna model**
- **Evaluation boards available for all antenna models**

The cellular tab mount antenna range offers a package of extremely versatile antenna options for 3G, 4G, 5G, LTE and incorporated GNSS on some models. Providing omnidirectional coverage and an improved performance over alternatives, such as direct to PCB mount chip antennas. Evaluation boards, with matching circuits, are available for all models to allow for ease of integration and testing during design phases.

APPLICATIONS

- IoT Devices
- Handheld Devices
- Smart Home
- Smart Security
- Aids for Daily Living (ADL)

ELECTRICAL

- **Voltage rating:** 20V
- **Current rating:** 5A
- **Data transmission:** Up to 40 Gbps

MECHANICAL

- Varies by model. See individual datasheets linked in the customer presentation

MATERIALS

- Varies by model. See individual datasheets linked in the customer presentation

KEY BENEFITS

- High efficiency and low profile
- Small ground plane requirement 91 or 100mm depending on antenna model
    - Smaller ‘keep out’ area required compared to other antenna types
- Evaluation boards available for all antenna models

STANDARDS AND SPECIFICATIONS

- Varies by model. See individual datasheets linked in the customer presentation
