Bourns® PDB241-GTR Series Product Extension Release

Extended Rotational Life Option

Riverside, California – May 6, 2025 – In line with our commitment to provide products with innovative designs, superior quality and exceptional value, Bourns Sensors and Controls announces the extension of the PDB241-GTR Series with an Extended Rotational Life option.

Bourns® Model PDB241-GTR Series is designed for use in professional guitars and sound equipment. The extended rotational life option provides enhanced durability in the field, allowing the series to reach a rotational life of 100,000 cycles. This specialty product is specifically suited for use in electric guitars with thick bodies.

Basic features and applications include the following:

Features

- Extended rotational life option
- Low torque
- Carbon element
- Plain or knurled shaft option
- Metal bushing
- Metal shaft
- Rear solder lugs
- Audio or linear taper options
- Variety of resistance values
- RoHS compliant*

Applications

- Professional audio equipment
- Electric guitars

Samples and production quantities are now available. For your convenience, the data sheet and Material Declaration Sheet are now available at bourns.com.
